History of reliability

Since its formation by Anton Piller in 1909, the company Piller has been synonymous with electrical machines of the highest quality and reliability. Today, Piller, from its headquarters in Germany and via its regional offices, representatives and distributors worldwide, continues that tradition into the 21st century.

Piller produces high performance power protection systems and converters. Combined with the highest levels of customer support and engineering excellence available anywhere, Piller is internationally recognised as the most respected name in its field.

Our 'know-how' doesn't just help protect the environment with high efficiency solutions; it protects reputations, provides peace of mind and promotes confidence within your business.

Piller is a wholly owned subsidiary of the multi-disciplined global UK engineering group, Langley Holdings plc. (www.langleyholdings.com)

*'internationally recognised
as the most respected name in its field'*

PILLER

Products and markets

In the field of power protection, Piller occupies a unique position, being the only company to produce a range of dynamic and static technologies. From this position, Piller can advise its clients exclusively on the most suitable solution for their particular application and if required, provide complete systems 'turn-key'.

Often, the merest interruption of power can cause catastrophic results, high quality product and unrivalled service give peace of mind in the critical areas of a customer's business.

Piller's expertise spans banking and financial markets, insurance, computing, telecommunications and broadcasting, healthcare, airports, air traffic control, industry and manufacturing. Today, Piller serves a global market place.

In the area of 400Hz, aircraft ground power and 50/60Hz frequency conversion, Piller converters and related products are widespread in both military and civil applications, providing power systems to airports world wide, shore-to-ship and on-board power systems for both submarine and surface vessels for more than 35 years.

Piller converter systems are also designed as an integral part of other power systems, for example in the wind power industry and in the light rail transport sector.

'Often, the merest interruption of power can cause catastrophic results'

Facilities

Research and Development

Piller UPS systems are recognised as the most reliable and technologically advanced - but Piller does not stop there. Piller remains at the very forefront of technology by maintaining a vigorous product development programme, working closely with customers, universities and other research institutes. Piller's on-going programme not only investigates new and innovative machines and applications, but is also continually exploring the boundaries of reliability, efficiency and cost effectiveness of existing products.

Modern Manufacturing

Modern, purpose-built manufacturing facilities at Piller Osterode headquarters site in Germany, and purpose-built assembly and testing facility at nearby Bilshausen, extend to some fourteen hectares and approaching 50,000m² of accommodation. These facilities are absolutely state-of-the-art, and are widely regarded as the most comprehensive of their kind.

PILLER

Global presence

Piller stays as close to their clients as possible, maintaining contact and developing long-term fruitful partnerships. Under the Piller Group, there are eight customer facing subsidiaries, providing regional support for sales, project management and aftermarket services.

A worldwide network of distributors and representatives augment these Piller companies. This global coverage enables Piller to offer the same high standards of service throughout the world.

- Piller and Subsidiaries
- Distributors/Representative Offices

Piller Headquarters is the home of Piller Group GmbH and Piller Germany GmbH & Co. KG

Unrivalled after sales service

Unrivalled After Sales Service

Competence and responsiveness are the watchwords of our business.

Piller believes that product and service belong together, and the Piller name is synonymous with excellent after sales service. The best technology is only as good in the long term as the service that underpins it.

For this purpose, a comprehensive network of qualified service staff is available – world-wide.

The premium quality and technical maturity of every Piller product already guarantees a high degree of functional security, and together with quality maintenance, this further reduces any risk of possible breakdown.

Piller offers a comprehensive package of services tailored to your requirements:

- **Technical consultation**
- **Operator training**
- **Functional testing**
- **Maintenance**
- **Fault analysis and troubleshooting**
- **Customer training**
- **Remote system diagnosis and support**

Service Team Capability

Piller's customer service engineering team is highly qualified and trained on all products and services. As a combined total, field service teams have centuries of experience working on three generations of UPS systems. Piller operates a 'best of breed' philosophy in all working practices and is believed to be market leader in first time resolution of site problems.

Piller Service

Piller understands that malfunctions can also occur outside working hours, which is when competent help is needed quickly. For this reason an emergency call-out service is in operation.

Service centres are strategically positioned in relation to Piller's installed base for the best possible response time and familiarity with clients' installations.
